

**CURTAIN**

# Secured e-locker in workstation

- Safeguard your intellectual properties
- Prevent unauthorized use of confidential files
- Prevent confidential files from leaking to competitors

- **Protect your information and ideas**
- **Differentiate your company from competitors**
- **Safeguard your intellectual properties**
- **Expand your business without worrying security**

**Do you:**

- have problems in protecting your intellectual properties?
- want to prevent confidential files from being copied to external sources?
- want to stop confidential files from leaking to your competitors?
- want to differentiate your company from competitors?
- want to protect your ideas?

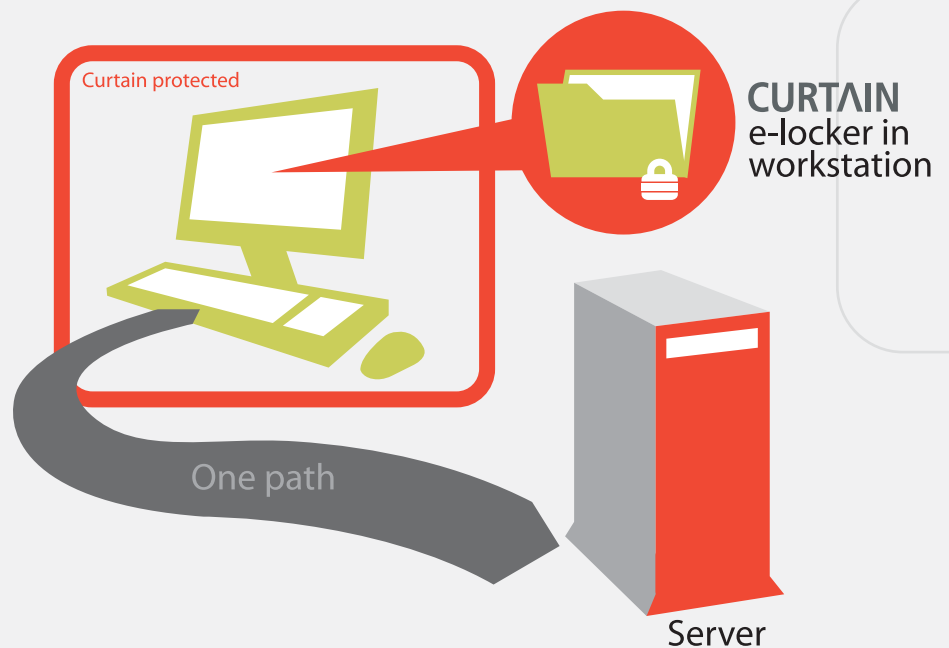

Then **CURTAIN** is the unique solution!

**Curtain** is a data security system that prevents your confidential files from leaking out of the company. Curtain allows users to access confidential files by using corresponding software, such as MS Word, MS Excel, AutoCAD and SolidWorks, but NOT to *print, save as, or send files* to external sources, such as floppy disk, USB disk, CDR, web mail.

**Curtain Technology** creates a special directory called "*Protected Directory*" in client machine. When users access confidential files stored in server, files will be automatically downloaded to client's Protected Directory. Users can do anything inside Protected Directory (such as New Copy, Rename, Delete, Edit), but they cannot copy files from Protected Directory to external sources. If users make modifications on downloaded files and they want to update copies on the server, files can be uploaded to a pre-defined server location.

**Curtain Modules** cover the most popular software, such as MS Word, MS Excel, Adobe Reader, AutoCAD, SolidWorks, Unigraphics, etc. Corresponding modules are required to protect corresponding file types. To check full list of Curtain Modules, please contact our resellers.

CURTAIN

用户端上的

# 安全区

- 保护企业的知识产权
- 防止不恰当使用重要文档
- 防止重要文档外泄或被盗用

# Secured e-locker in workstation

## 用户端上的 安全区

### 你是否：

- 在保护企业知识产权的问题上遇到困难？
- 想防止重要文档被复制到企业以外？
- 想阻止重要文档外泄到企业的竞争对手中？
- 想企业与众不同，在市场中突围而出？
- 想保护好的点子？

### CURTAIN 是你的最佳解决方案

**Curtain**是一个用户端上的资料保安系统。Curtain 防止重要文档外泄或被复制到企业以外的地方，用户可以使用相关的软件来阅读或修改文档，例如：MS Word、MS Excel、AutoCAD、SolidWorks等。但Curtain 可以防止她们列印、另存新档、复制档案到企业之外，例如：磁片、USB盘、光碟等。

**Curtain Technology**会在用户端上新增一个特别的文件夹，此文件夹称为安全区，当用户需要使用文档时，档案会自动从企业的伺服器中下载到用户端上的安全区内。在安全区内，用户可以使用任何功能来处理档案（例如：新增、重新命名、删除、修改文档等），但是她们不能从安全区中复制档案到企业以外的地方。假如用户对下载的档案作出修改，并想更新在伺服器中的版本，在安全区内的档案可以上载到伺服器中预先设定好的位置。

**Curtain Modules**支援市面上大部份流行的软件，例如：MS Word、MS Excel、Adobe Reader、AutoCAD、SolidWorks、Unigraphics 等。用户只需要安装相关Curtain 模组来保护相关文档。有关资料，请联络我们的代理商。

保护企业的知识与经验  
令企业与众不同，在市场中突围而出  
保护企业的知识产权  
令企业在不需要担心保安问题下茁壮成长
